Spence Restoration Nursery

**Plants sold by the Wayne County SWCD
are produced by
Spence Restoration Nursery
in Muncie, Indiana.**

**Spence Nursery is a wholesale
nursery providing high quality nursery
propagated native plant material for the
restoration of native plant communities,
and the creation of environmentally sound
natural landscapes.**

**The network of roots is spread
throughout the container with
no encircling tendencies. The 2 3/8”
square by a 3 3/4” deep open bottom pot
allows production of a healthy root system
that spreads rapidly into the soil after the
transplanting. Open bottom pots allow
water to move freely into and out
of the pot.**

**Guaranteed true to type and in good
condition at pickup time.**

Flowers

Blue Flag Iris has gorgeous blue flowers with distinct yellow patch. It is native to wetlands and adapts well to moist garden soil. Cross pollinated by bumble bees and long horn bees. It also attracts butterflies.
Mature height: 2-3 feet
Blooms: May-June
Light: full sun-partial sun
Site: moist soil—shallow water

Bottle Gentian has striking blue flowers that remain closed, having the appearance of buds throughout their development. Bumble bees are the main pollinator as they are able to force their way into the flower.
Mature height: 1-2 feet
Blooms: September-October
Light: full sun
Site: moist to wet soils

SOLD OUT

Butterflyweed is most often a distinctive bright orange but there is some variation in flower color, from deep red-orange to yellow. The vivid orange color, low mounded profile, and ability to attract and sustain butterflies make this plant a well-known favorite for all types of gardens. This is a great milkweed for a sunny location!
Mature height: 1-2 feet
Blooms: September
Light: full sun
Site: dry soils

Grasses

Palm Sedge is an attractive sedge with light green tropical-like foliage throughout the growing season. Foliage becomes straw colored in the fall.
Mature height: 1-2 feet
Light: shade
Site: moist to wet soils

Prairie Dropseed is a great choice of grass for your native landscape. It has a wonderful tussock-forming growth habit and takes on a nice golden hue all throughout the fall and winter. It excels in hot, dry conditions where it can really soak up the sun. The seeds of this species, which drop in the fall, are a great food for seed eating birds.
Mature height: 1-3 feet
Light: full sun
Site: dry to moist soils

Mothers Day May 13!

Grasses

Burr Sedge is an ornamental species with interesting seedheads that resemble the spiked mace from medieval days. The yellow seedheads turn a rich brown color.
Mature height: 1-2 feet
Light: partial sun-shade
Site: moist to wet soils

Northern Sea Oats is a lovely grass with graceful, persistent oat-like seedheads. Deep green foliage color in the spring turns lighter green in summer, copper in the fall, and pale tan in the winter. It is handsome when planted in masses and it thrives in shade.
Mature height: 2-3 feet
Light: partial sun—shade
Site: moist soils

Flowers

Cardinal Flower is named for its beautiful scarlet red flowers which are an important nectar source for hummingbirds and swallowtail butterflies. It is a showy plant that makes excellent cut flowers.
Mature height: 1-3 feet
Blooms: August—September
Light: full sun-full shade
Site: moist to wet soils

Cream False Indigo has gorgeous flowers appearing early in the season. They are pollinated by queen bumble bees as they emerge from hibernation. The plant also hosts the larvae of several butterflies and moths.
Mature height: 1 foot
Blooms: May
Light: full sun—partial sun
Site: dry to moist soils

Great Blue Lobelia has spikes of blue flowers that will attract bumblebees, butterflies, and hummingbirds. It is the counterpart of the Cardinal flower listed above.
Mature height: 1-3 feet
Blooms: August-September
Light: full sun-full shade
Site: moist to wet soils

Flowers

Monkey Flower has a lavender snapdragon-like flower. It is visited by both bees and hummingbirds. The flower resembles a grinning monkey face—pinch the sides and the monkey will laugh!
Mature height: 2-4 feet
Blooms: July-September
Light: full sun
Site: moist to wet soils

Purple Coneflower flowers are a golden red to purple and may release a slight fragrance in strong sunlight. They are much-loved by butterflies and bees!
Mature height: 3-4 feet
Blooms: June-August
Light: full sun—partial sun
Site: dry soils

Royal Catchfly Hummingbirds flock to this plant. Sticky glands cover the plant and small insects often become trapped, hence the name Catchfly.
Mature height: 2-4 feet
Blooms: July-August
Light: full sun
Site: moist soils

Flowers

Smooth Penstemon is an attractive species with light purple flowers above lush green foliage. It is visited by bees, butterflies, and hummingbirds.
Mature height: 2-3 feet
Blooms: June
Light: partial sun-shade
Site: moist to wet soils

Sweet Black Eyed Susan has beautiful yellow daisies with dark centers. It is visited by bees and butterflies.
Mature height: 3-5 feet
Blooms: August—September
Light: full sun
Site: moist to wet soils

Wild Bergamot is an easy growing plant with purple blooms.. It has a distinctively aromatic foliage as it is in the mint family. Bergamot is a favorite of butterflies, bees and hummingbirds!
Mature height: 2-4 feet
Blooms: July—August
Light: full sun
Site: moist soils
