

Rain Garden 6-pack

Blue Flag Iris has gorgeous blue flowers with distinct yellow patch. It is native to wetlands and adapts well to moist garden soil. Cross pollinated by bumble bees and long horn bees. It also attracts butterflies.
Mature height: 2-3 feet
Blooms: May-June
Light: full sun-partial sun
Site: moist soil—shallow water

Monkey Flower has a lavender snapdragon-like flower. It is visited by both bees and hummingbirds. The flower resembles a grinning monkey face—pinch the sides and the monkey will laugh!
Mature height: 2-4 feet
Blooms: July-September
Light: full sun
Site: moist to wet soils

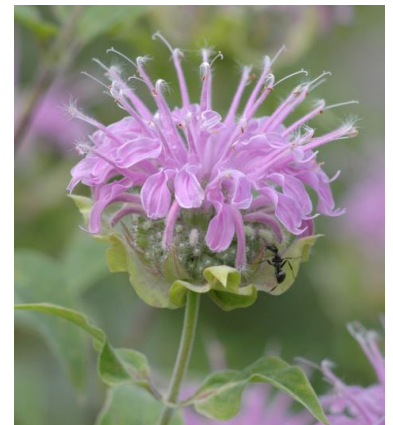

Obedient Plant has pink tubular/snapdragon like flowers that will attract bumblebees and hummingbirds. Name comes from the flower's ability to stay put when moved to a different position.
Mature height: 2-4 feet
Blooms: August-September
Light: full sun to partial shade
Site: moist soils

Purple Coneflower flowers are a golden red to purple and may release a slight fragrance in strong sunlight. They are much-loved by butterflies and bees!
Mature height: 3-4 feet
Blooms: June-August
Light: full sun—partial sun
Site: moist to dry soils

Royal Catchfly The brilliant red flowers makes hummingbirds flock to this plant. Sticky glands cover the plant and small insects often become trapped, hence the name Catchfly.
Mature height: 2-4 feet
Blooms: July-August
Light: full sun
Site: moist soils

Wild Bergamot is an easy growing plant with its light purple blooms. It has a distinctively aromatic foliage as it is in the mint family. Bergamot is a favorite of butterflies, bees and hummingbirds!
Mature height: 2-4 feet
Blooms: July—August
Light: full sun
Site: moist soils
